## 1. Overview of Operating Results, etc.

### (1) Overview of Operating Results for the Six Months Ended September 30, 2024

Although the upward trend of capital investment continued driven by buoyant corporate earnings, the outlook of the Japanese economy remains uncertain because of persisting risks, including destabilizing international circumstances, exchange rate fluctuations, and increasing interest rates, among others, in addition to rising demand for labor and price increases.

Regarding the business environment in which the Group operates, whereas vigorous capital investment in the renewable energy field is expected in view of the growing need for investment in decarbonization, the volume of construction at conventional power stations, which has been the Company's core business for many years, has been trending downward. Furthermore, because of the cost impact of prices of materials and equipment and soaring labor costs as well as chronic labor shortages, the business environment continues to be challenging.

In these circumstances, the Group has judged that it is important to pursue a business strategy of diversifying revenue streams by expanding our presence in the general industry and other market, as well as in the renewable energy-related market, in view of the fact that our business has been overly dependent on the electric power market, and we launched the FY2024 mid-term management plan (FY2024-FY2026) in April 2024, which focuses on strengthening human capital.

Specifically, in accordance with the basic policy of "creating a strong and flexible Q'd with people at the core," we are addressing the following key issues: "strengthen human capital by investing in human resources," "refine 'Q'd' so as to be chosen by customers," and "strengthen ties with all people and organizations involved in our company."

For example, in June 2024, in order to strengthen sales capabilities and competitiveness, we executed a reorganization, creating corresponding to functions, such as sales, construction cost estimating, and construction, and established new branches that serve as sales bases rooted in each region. As a result, it has become possible to integrate information, knowledge, and skills, which had been dispersed, and this is leading to the receiving of orders from new customers and in new fields.

Total orders received were ¥37,827 million (up 36.1% year-on-year), owing mainly to the receiving of orders concerning the installation of additional facilities for chemical plants, maintenance and repair work for oil refineries, air conditioning work at public facilities, solar power facilities for on-site power purchase agreements (PPA), implementation of business continuity planning (BCP) measures, work for recovery from torrential rain, new projects for decarbonization of thermal power plants through synergy with the components manufacturing business of an overseas subsidiary, preparation for resumption of operation of nuclear power plants, etc.

Meanwhile, net sales were ¥30,541 million (down 26.1% year-on-year), because implementation of safety measures at nuclear power plants and construction of thermal power plants have run their course and projects related to treated water at the Fukushima Daiichi Nuclear Power Plant were completed, despite the progress of installation of solar power generation facilities as well as installation of new and additional facilities for substations.

The amount carried forward to the next period was ¥104,962 million (down 3.2% year-on-year).

As for profits, operating loss was ¥249 million (compared to operating profit of ¥1,002 million for the same period of the previous fiscal year) due to a decrease in net sales and an increase in the cost ratio (an increase in subcontracting costs in line with labor shortages, etc.). On the other hand, ordinary profit was ¥243 million (down 85.9% year-on-year) due mainly to the recording of foreign exchange gains in line with exchange rate

fluctuations. Profit attributable to owners of parent amounted to ¥630 million (down 23.0% year-on-year), reflecting a gain on sale of investment securities. They were sold in order to improve asset efficiency and strengthen the financial position.

Business results by segment were as follows.

(Facilities Construction)

Total orders received were ¥34,614 million (up 38.3% year-on-year) due to increases in the Energy Division and the Nuclear Power Division.

Net sales were ¥27,412 million (down 29.1% year-on-year) due to decreases in the Energy Division and the Nuclear Power Division.

(Other Businesses)

Total orders received were ¥3,194 million (up 15.4% year-on-year).

Net sales were ¥3,111 million (up 15.0% year-on-year).

Reference: Names of divisions, etc. corresponding to the segments

Segment name	Division, etc.
Facilities Construction	Green Energy Business Division, Energy Division, Nuclear Power Division, Welding and Inspection Engineering Center, Overseas Division
Other Businesses	Power generation business, real estate business, leasing and rental business, insurance agency, manufacture and sale, wholesale

Note: Following the reorganization in the first quarter of the fiscal year under review, the “Energy and Industry Division” and the “Electric Power Division” of the “Facilities Construction” segment were integrated and the “Energy Division” was established.

(2) Overview of Financial Position for the Six Months Ended September 30, 2024

Total assets amounted to ¥95,395 million as of September 30, 2024, a decrease of ¥12,076 million from the end of the previous fiscal year. This was mainly due to a decrease in notes receivable, accounts receivable from completed construction contracts and contract assets.

Total liabilities amounted to ¥27,876 million as of September 30, 2024, a decrease of ¥11,046 million from the end of the previous fiscal year. This was mainly due to a decrease in other in current liabilities.

Net assets amounted to ¥67,518 million as of September 30, 2024, a decrease of ¥1,029 million from the end of the previous fiscal year. This was mainly due to a decrease in valuation difference on available-for-sale securities.

(3) Explanation of Consolidated Financial Results Forecast and Other Forward-looking Information

The financial results forecast, announced on May 8, 2024 has been revised.

Regarding revisions to the financial results forecast, please refer to the “Notice concerning Revisions to Financial Results Forecast” announced today (November 5, 2024).
